Propeller 10 x 4.5 Pusher

https://www.parallax.com/sites/default/files/styles/full-size-product/public/721-80001_1.png?itok=qTKdMxNp

Product ID: 721-80001	

Overview

The electric pusher propeller is a clockwise (CW) rotating RC propeller. These propellers are intended for use on airplanes or multicopters where a CW rotating propeller may be desirable. The carbon composite material is both stiffer and stronger than glass filled nylon. The additional stiffness is beneficial to control vibration resonance response.

Key Features:

- Selection of spacers to fit a variety of motors
- Large wash for lift
- Precise hole alignments

Application Ideas:

- Multicopters
- Pusher RC Planes

Details

- Max RPM - 8,000
- Dimensions: 10" Length 4.5 pitch
